

Program - Climate change

- Youth Perspectives on Security, Peace and Democracy

This years' global conference will be devoted to the pressing issue of climate change. The participants stem from a wide range of countries and organisations. This three-day-conference will provide the possibility for the group to examine the meaning of leadership, with the stimulating company of other committed individuals.

The transition towards sustainability will present new challenges for global leadership. Globalisation makes us more mutually interdependent than ever before. Leaders require a holistic mindset, and to be open for ideas on how to make our global village sustainable.

The purpose of the conference is to examine and discuss how the participants and their organisations can relate to, and work for, sustainability, and give the participants concrete tools to bring back home, to share with colleagues and friends.

Program - Climate change

- Youth Perspectives on Security, Peace and Democracy

This years' global conference will be devoted to the pressing issue of climate change. The participants stem from a wide range of countries and organisations. This three-day-conference will provide the possibility for the group to examine the meaning of leadership, with the stimulating company of other committed individuals.

The transition towards sustainability will present new challenges for global leadership. Globalisation makes us more mutually interdependent than ever before. Leaders require a holistic mindset, and to be open for ideas on how to make our global village sustainable.

The purpose of the conference is to examine and discuss how the participants and their organisations can relate to, and work for, sustainability, and give the participants concrete tools to bring back home, to share with colleagues and friends.
